Jonah Kulakofsky (Scrum Master)

Manav Bhatia (Team Member)

Product Name: We-Locate

Team Name: We-Locate

Release Name: Version 1

Revision Number: 1

Release Date: 3/9/21

Known Bugs

1. Google Login/Signup - Moderate/Major
 - a. If user inputs signup with an existing document using google login it will override the previously written
 - b. If user logs in without having an existing document it will not update saved changes
2. No code to update cards with updated API values - Moderate
 - a. Numbeo API updates their data regularly and that leads to duplicate cards for the same city being created since the values are different. There is no dynamic update of these numbers for older saved cards.
3. Card Height varies among results - Minor
 - a. Issue with the content size within the card
 - b. Cards in result-body.tsx
4. Warning messages - Minor
 - a. Firebase warning
 - i. Using development build
 - b. React warning for componentWillReceiveProps
 - i. Warning message okay, npm package used here is out of date
 - c. API warning
 - i. Using an old API
 - d. React unmounted component
 - i. Issue using class component
5. Mobile View Polishing Bugs - Extremely Minor
 - a. About.tsx - About page
 - b. Modal.tsx - Modal View

- c. `Navbar_middle.tsx` - `AboutProduct`
- 6. Save button shown when not logged in, but does not do anything if pressed - Minor
 - a. `Result-body.tsx`
